

RM160 RACKMOUNT SYSTEM

The Bluesound Professional RM160 is a rackmount system allowing up to 6 x B160S network streaming stereo amplifiers to be mounted in a 3U space in a 19" rack. The B160 modules slot in from the front and are secured by a front panel screw, allowing for swift replacement when required. B160S units are supported front and back and cabling is tidied with a rear tray.

FEATURES

- 3U rackmount system for B160S network streaming stereo amplifiers
- Can accommodate up to 6 x B160S in 3U rack space
- B160S units mounted from front with front and rear support
- Rear cable tray to facilitate cable management
- Blanking panels available for unused slots
